

Testing guidelines for the Sheet - Legend

The first sheet of our project is named **Legend** and its outlook is as shown below.

This sheet works as the legend for the project, which is mainly for reference purpose. There are two keys in this sheet

- **Country names & Country codes** – These have been used instead of the country names, frequently in the project.
- **Indicators & Indicator Codes** - Indicators are used to denote the field of work that each entrepreneur is a part of. Their codes denotes the work sector and have been used throughout the project.

The four visualizations in this sheet are

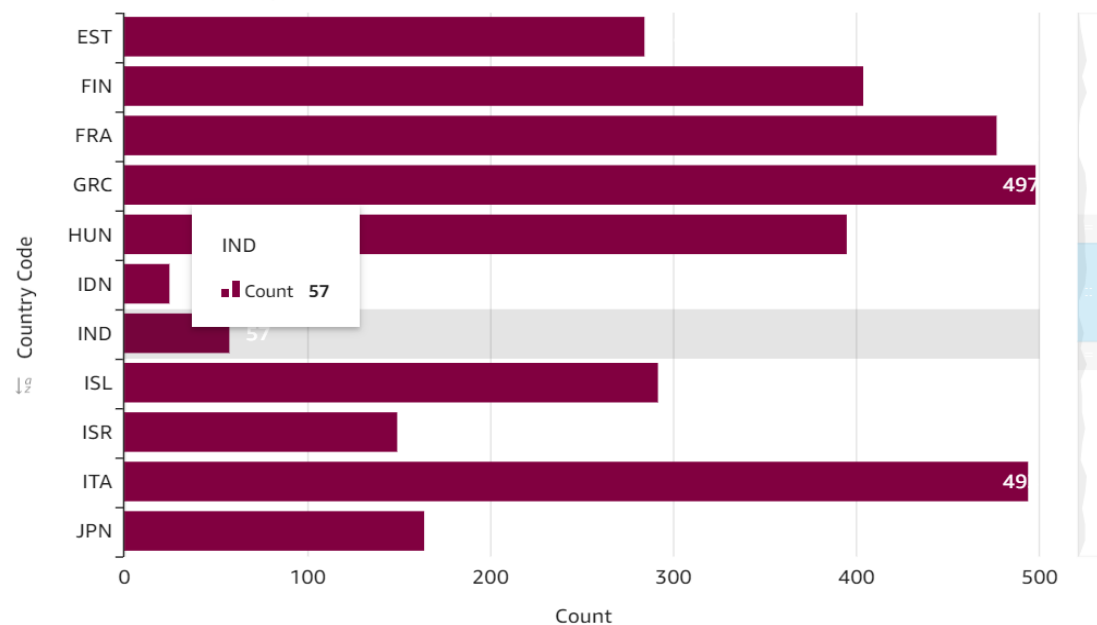

- Participation Strength of various Countries** – This viz. tells us the total number of participants from each country. As it can be seen, there is unequal participation from each country.
- Country and Country Codes** – This viz. works as the key to map country names with their respective country codes.
- Indicators and their codes** – This visualization acts as the legend between the name of the work sector and the code given by OECD to each of them
- No. of people working in different sector(s)** – This visualization is used to show the importance of each work field by comparing the number of entrepreneurs working in that sector.

Step 1 - Click on any visualization to get further access to it.

1.1 Participation Strength of various Countries

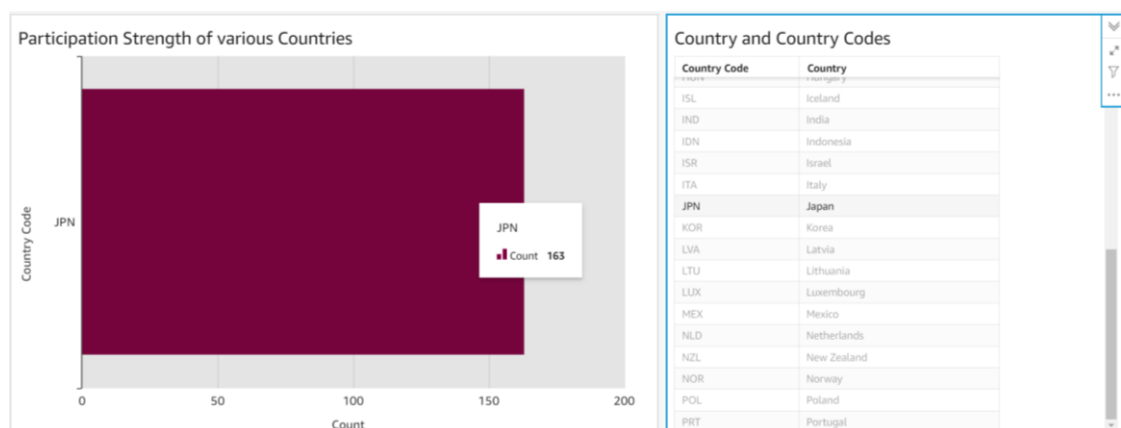

- Now you can scroll up and down in the visualization to check the participation strength of each country.
- For knowing the exact strength of the country, you may hover over the bar for that country.

Participation Strength of various Countries

1.2 Country and Country Codes

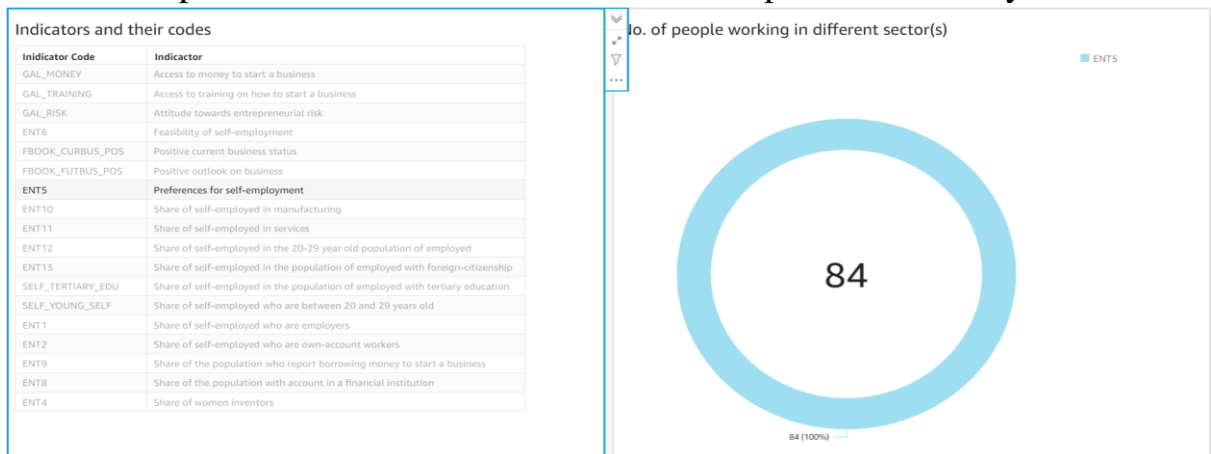

- In this visualization too, you can scroll up and down to know the country codes of all the countries
- Also, you may click on a particular country name/country code, to know the number of people that participated in the survey from only that country in the adjacent visualization.

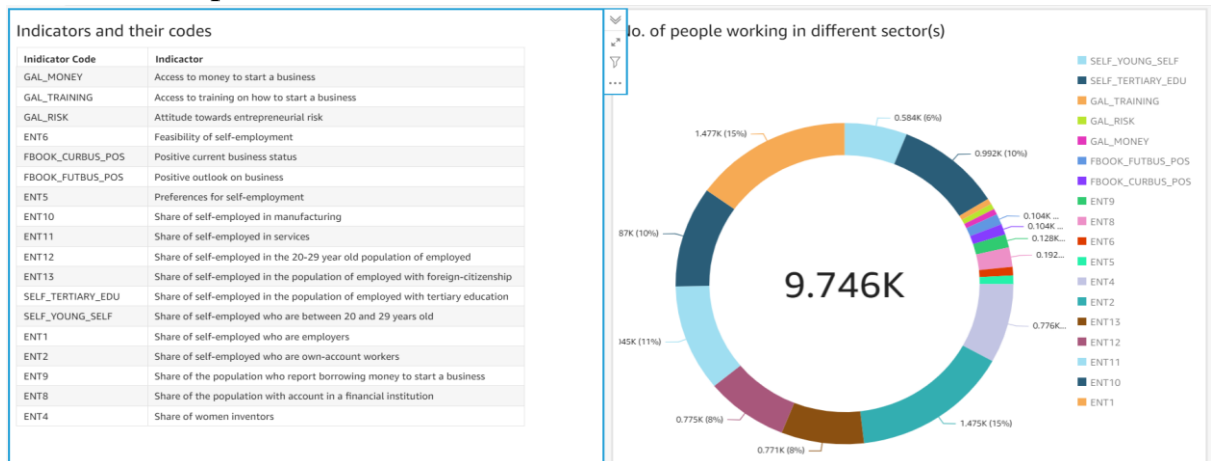

- If you want to go back to the original view, click anywhere on the blank space in the visualization

1.3 Indicators and their codes

- Click on any of the indicators or code to check the number of entrepreneurs of that sector who have taken part in the survey.

- If you want to go back to the original view, click anywhere on the blank space in the visualization.

1.4 No. of people working in different sector(s)

- If you click on any arc (colored section), you can check the respective indicator's name and strength of entrepreneurs in that particular working area.
